2	Dr.G.M.Sajjanar Associate Professor S.V.M.Arts, Science & Commerce College,Ilkal-587125	Member
3	Shri.G.M.Karki M.M.College, Belagavi	Member

PREAMBLE

The learning outcomes-based curriculum framework for B.Sc. Degree in Zoology is structured to offer a broad outline within which a Zoology program could be developed. The Zoology course is upgraded keeping in mind the aspirations of students, changing nature of the subject as well as the learning environment. Courses within Zoology have been revisited to incorporate recent advancements, techniques to upgrade the skills of learners. The new structure is expected to enhance the level of understanding among students and maintain the standard of Zoology degrees/program. Effort has been made to integrate use of recent technology and use of MOOCs to assist teaching-learning process among students.

This framework permits there view of graduate attributes, qualification descriptors; program learning out comes and course-level learning outcomes periodically. The framework offers flexibility and innovation in syllabi designing and in methods adopted for teaching- learning process and learning assessment. The major objective is to elevate the subject knowledge of the students, making them critical thinkers and able to solve problems and issues related to Zoology logically and efficiently. Overall, this course has been modified to upgrade skills related to biological science and provide our students a competitive edge in securing a career in academia, industry, pharmaceutical research and development in private as well as public sectors. This course serves as plethora of opportunities in different field's right from classical to applied Zoology.

Zoology has been studied in an integrated and cross-disciplinary manner with a comprehensive understanding of all living systems, their relationship with the ecosystem and their application. The framework imbibes a Learning Outcome-based Curriculum Framework (LOCF) for its entire Under Graduate program in Zoology.

A comprehensive understanding and appreciation of the organism differences through ICT tools, MOOCs and well-designed hands on practical exposures along with the fieldwork and if the same principle is followed to understand different phyla through the ladder of evolution and compare cardinal features for classification involving both morphological and molecular tools, along with associated field and lab work, the final product would be better trained without rote learning. Syllabi required are to impart and assess the quality of critical thinking, analytical and scientific reasoning, reflective thinking, information and digital literacy, and problem-solving capacity.

Aim of program deals with the study of animal kingdom specially the structural diversity, biology, embryology, evolution, habits and distribution of animals, both living and extinct. As it covers a fascinating range of topics, the modern zoologists need to have insight into many disciplines.

The Zoology courses designed in terms of concepts, mechanisms, biological designs & functions and evolutionary significance. The students should do the dissertation/project work under practical of different courses, wherever possible.

Program Learning Outcome

Students enrolled in B.Sc. (Hons.) degree program in Zoology will study and acquire complete knowledge of disciplinary as well as allied biological sciences. At the end of graduation, they should possess expertise which will provide them competitive advantage in pursuing higher studies from India or abroad; and seek jobs in academia, research or industries.

Students should be able to identify, classify and differentiate diverse chordates and non-chordates based on their morphological, anatomical and systemic organization. They will also be able to describe economic, ecological and medical significance of various animals in human life. This will create a curiosity and awareness among them to explore the animal diversity and take up wild life photography or wild life exploration as a career option. The procedural knowledge about identifying and classifying animals will provide students professional advantages in teaching, research and taxonomist jobs in various government organizations; including Zoological Survey of India and National Parks/Sanctuaries.

Acquired practical skills in biotechnology, biostatistics, bioinformatics and molecular biology can be used to pursue career as a scientist in drug development industry in India or abroad. Our students will be acquiring basic experimental skills in various techniques in the fields of genetics; molecular biology; biotechnology; qualitative and quantitative microscopy; enzymology and analytical biochemistry. These methodologies will provide extra edge to our students, who wish to undertake higher studies. In-depth knowledge and understanding about comparative anatomy and developmental biology of various biological systems; and learning about the

Concept Note, Abbreviation Explanation and Coding:

Concept Note:

1. **CBCS** is a mode of learning in higher education which facilitates a student to have some freedom in selecting his/her own choices, across various disciplines for completing a UG/PG program.
2. A credit is a unit of study of a fixed duration. For the purpose of computation of workload as per UGC norms the following is mechanism be adopted in the University:
One credit (01) = One Theory Lecture (L) period of one (1) hour.
One credit (01) = One Tutorial (T) period of one (1) hour.
One credit (01) = One practical (P) period of two (2) hours.
3. Course: paper/subject associated with AECC, DSC, DSEC, SEC, VBC, OEC, VC, IC and MIL
4. In case of B.Sc. Once a candidate chose two courses/subjects of a particular two department in the beginning, he/she shall continue the same till the end of the degree, and then there is no provision to change the course(s) and Department(s).
5. A candidate shall choose one of the Department's courses as major and other Department course as minor in fifth and sixth semester and major course will get continued in higher semester.
6. Wherever there is a practical there will be no tutorial and vice-versa
7. A major subject is the subject that's the main focus of Core degree/concerned.
8. A minor is a secondary choice of subject that complements core major/concerned.
9. Vocational course is a course that enables individual to acquire skills set that are required for a particular job.
10. Internship is a designated activity that carries some credits involving more than **25days** of working in an organization (either in same organization or outside) under the guidance of an identified mentor. Internship shall be an integral part of the curriculum.
11. **OEC: For non computer science students. Computer Science students have to opt for OEC from departments other than major and minor disciplines.**

Abbreviation Explanations:

1. AECC: Ability Enhancement Compulsory Course.
2. DSC: Discipline Specific Core Course.
3. DSEC: Discipline Specific Elective Course.
4. SEC: Skill Enhancement Course.
5. VBC: Value Based Course.
6. OEC: Open/Generic Elective Course
7. VC: Vocational Course.
8. IC: Internship Course
9. L1: Language One
10. L2: MIL
11. L= Lecture; T=Tutorial; P=Practical.
12. MIL=Modern Indian Language; English or Hindi or Telugu or Sanskrit or Urdu

Program Coding:

1. Code21: Year of Implementation
2. Code BSc: BSc Program under the faculty of Applied Science of the University
3. Code1: First Semester of the Program, (2 to 6 represent higher semesters)
4. CodeAE: AECC, (C for DSC, S for SEC, V for VBC and O for OEC)
5. Code1: First-AECC || Course in semester, similarly in remaining semester for such other courses
6. Code LK: Language Kannada, similarly Language English, Language Hindi, Language Telugu, Language Sanskrit, & Language Urdu
7. Code1: Course in that semester.
8. Zoo: Zoology

Note: All skill enhancement course (SEC) syllabus and title should be selected time to time notice from the university and/or NEP committee accordingly.

ASSESSMENT METHODS**Evaluation Scheme for Internal Assessment:****Theory:**

Assessment Criteria	40marks
1 st Internal Assessment Test for 30 marks 1 hr after 8 weeks and 2 nd Internal Assessment Test for 30 marks 1hr after 15 weeks. Average of two tests should be considered.	30
Attendance > 75%	05
Assignment	05
Total	40

Assessment Criteria	25marks
1 st Internal Assessment Test for 20 marks 1 hr after 8 weeks and 2 nd Internal Assessment Test for 20 marks 1hr after 15 weeks. Average of two tests. Should be considered.	20
Attendance > 75%	05
Total	25

Practical:

Assessment Criteria	25 marks
1 st Internal Assessment Test for 15 marks 1/2 hr after 8 weeks and 2 nd Internal Assessment Test for 15 marks 1/2hr after 15 weeks. Average of two tests should be considered.	15
Attendance > 75%	05
Assignment	05
Total	25

Question Paper Pattern:

RANI CHANNAMMA UNIVERSITY
Department of ZOOLOGY

I Semester B.Sc (Zoology)

Duration: 2 hrs

Sub:

Code:

Maximum Marks: 60

a. Answer any six Questions from Question I

b. Answer any Three questions from each main questions numbers II, III, IV and V

Q.No.I	Answer any six Questions (Two question from Each Unit) 1. 2. 3. 4. 5. 6. 7. 8.	2X6=12
Q.No.II	(Should cover Entire Unit-I) 9. 10. 11. 12.	4X3=12
Q.No.III	(Should cover Entire Unit-II) 13. 14. 15. 16.	4X3=12
Q.No.IV	(Should cover Entire Unit-III) 17. 18. 19. 20.	4X3=12
Q.No.V	(Should cover Entire Unit-IV) 21. 22. 23. 24.	4X3=12

SYLLABUS

Semester I

Year	I	Course Code: 21BSC1C1ZOO1L	Credits	04
Sem.	1	Course Title : Cytology, Genetics and Infectious Diseases	Hours	56
Unit No.	Course Content			Hours
Unit I	Structure and Function of Cell Organelles I in Animal cell • Plasma membrane: chemical structure—lipids and proteins • Endomembrane system: protein targeting and sorting, transport, endocytosis and exocytosis Structure and Function of Cell Organelles II in Animal Cell • Cytoskeleton: microtubules, microfilaments, intermediate filaments • Mitochondria: Structure, oxidative phosphorylation; electron transport system Peroxisome and Ribosome: structure and function			14
Unit II	Nucleus and Chromatin Structure • Structure and function of nucleus in eukaryotes • Chemical structure and base composition of DNA and RNA • Structure of chromosomes • Types of DNA and RNA Cell cycle, Cell Division and Cell Signaling • Cell division: mitosis and meiosis • Introduction to Cell cycle and its regulation, apoptosis • Signal transduction: intra cellular 11 signaling and cell surface receptors, via G-protein linked receptors • Cell-cell interaction: cell adhesion molecules, cellular junctions			14

Unit III	Mendelism and Sex Determination • Basic principles of heredity: Mendel's laws- monohybrid cross and hybrid cross • Complete and Incomplete Dominance • Genetic Sex-Determining Systems, Environmental Sex Determination, Sex Determination and mechanism in <i>Drosophila melanogaster</i>. • Sex-linked characteristics in humans and dosage compensation Extensions of Mendelism, Genes and Environment • Extensions of Mendelism: Multiple Alleles, Gene Interaction. • The Interaction Between Sex and Heredity: Sex-Influenced and Sex-Limited Characteristics • Cytoplasmic Inheritance, Genetic Maternal Effects. Interaction between Genes and Environment: Environmental Effects on Gene Expression, Inheritance of Continuous Characteristics.	14
----------	--	----

Unit IV	Human Chromosomes and Patterns of Inheritance • Patterns of inheritance: autosomal dominance, autosomal recessive, X-linked recessive, X-linked dominant. • Chromosomal anomalies: Structural and numerical aberrations with examples. • Human karyotyping. Infectious Diseases • Introduction to pathogenic organisms: viruses, bacteria, fungi, protozoa and worms. • Structure, life cycle, pathogenicity, including diseases, causes, symptoms and control of common parasites: <i>Trypanosoma</i>, <i>Giardia</i> and <i>Wuchereria</i>	14
---------	---	----

Suggested Readings:

1. Lodish et al: Molecular Cell Biology: Freeman & Co, USA (2004).
2. Albert et al: Molecular Biology of the Cell: Garland (2002).
3. Cooper: Cell: A Molecular Approach: ASM Press (2000).
4. Karp: Cell and Molecular Biology: Wiley (2002). Pierce B. Genetics. Freeman (2004).

6. Watson et al. Molecular Biology of the Gene. Pearson (2004).
7. Thomas J. Kindt, Richard A. Goldsby, Barbara A. Osborne, Janis Kuby-Kuby Immunology. W H Freeman (2007).
8. Delves Peter J., Martin Seamus J., Burton Dennis R., Roitt Ivan M. Roitt's Essential Immunology, 13th Edition. Wiley Blackwell (2017).
9. Principles of Genetics by B.D.Singh
10. Cell- Biology by C.B.Pawar, Kalyani Publications
11. Economic Zoology by Shukla and Upadhyaya

Zoology-Lab Course Content

Semester-I

Course Title:Cell Biology & Cytogenetics	Course Credits:2
CourseCode:21BSC1C1ZOO1P	L-T-P perweek:0-0-4
Total Contact Hours: 56	Duration of ESA:4Hours
FormativeAssessmentMarks:25	SummativeAssessmentMarks:25

Course Outcomes (COs):

At the end of the course the student should be able to:

1. To use simple and compound microscopes.
2. To prepare stained slides to observe the cell organelles.
3. To be familiar with the basic principle of life, how a cell divides leading to the growth of an organism and also reproduces to form new organisms.
4. The chromosomal aberrations by preparing karyotypes.
5. How chromosomal aberrations are inherited in humans by pedigree analysis in families The antigen- antibody reaction

Course Articulation Matrix: Mapping of Course Outcomes (COs) with Program Outcomes (POs)

Course Outcomes(COs)/Program	CC P1	CC	CC	CC	CC	CC	CC	CC	CC	CC	CC	CC
I Core competency	X											
II Critical thinking	X											
III Analytical reasoning	X											
IV Research skills	X											
V Team work	X											

Note: Course Articulation Matrix relates course outcomes of course with the corresponding program outcomes whose attainment is attempted in this course. Mark 'X' in the intersection cell if a course outcome addresses a particular program outcome.

Lab Course Content

List of labs to be conducted	56 hrs
1. Understanding of simple and compound microscopes.	1
2. To study different cell types such as buccal epithelial cells, neurons, striated muscle cells using Methylene blue/any suitable stain (virtual/slaughtered tissue).	1+1
3. To study the different stages of Mitosis in root tip of <i>Allium cepa</i> .	1
4. To study the different stages of Meiosis in grasshopper testis (virtual).	1
5. To check the permeability of cells using salt solution of different concentrations.	1
6. Study of parasites in humans (e.g. Protozoans, Helminthes in compliance with examples being studied in theory) permanent micro slides.	1+1
7. To learn the procedures of preparation of temporary and permanent-stained slides, with available mounting material.	1
8. Study of mutant phenotypes of <i>Drosophila</i> sp. (from Cultures or Photographs).	1
9. Preparation of polygene chromosomes (Chironomus larva or <i>Drosophila</i> larva).	1+1
10. Preparation of human karyotype and study the chromosomal structural and numerical aberrations from the pictures provided. (Virtual/optional).	1+1

Suggested Readings:

1. Lodish et al: Molecular Cell Biology: Freeman & Co, USA (2004).
2. Alberts et al: Molecular Biology of the Cell: Garland (2002).
3. Cooper: Cell: A Molecular Approach: ASM Press (2000).
4. Karp: Cell and Molecular Biology: Wiley (2002). Pierce B. Genetics. Freeman (2004).
5. Thomas J. Kindt, Richard A. Goldsby, Barbara A. Osborne, Janis Kuby-Kuby Immunology. WHF Reeman (2007).
6. Kesar, Saroj and Vasishta N. 2007 Experimental Physiology: Comprehensive Manual. Heritage Publishers, New Delhi.

OPEN-ELECTIVE SYLLABUS:

Year	I	Course Code: 21BSC1O1ZOO1	Credits	03
Sem.	1	Course Title: Economic Zoology	Hours	42
Unit No.	Course Content		Hours	
Unit I	1. Sericulture: - History and present status of sericulture in India - Mulberry and non-mulberry species in Karnataka and India - Mulberry cultivation - Morphology and life cycle of <i>Bombyx mori</i> - Silkworm rearing techniques: Processing of cocoon, reeling - Silkworm diseases and pest control 2. Apiculture: - Introduction and present status of apiculture - Species of honey bees in India, lifecycle of <i>Apis indica</i> - Colony organization, division of labour and communication - Beekeeping as an agro based industry; methods and equipments: indigenous methods, extraction appliances, extraction of honey from the comb and processing - Bee pasturage, honey and beeswax and the viruses. Pests and diseases of bees and their management		14	
Unit II	3. Live Stock Management: Dairy: - Introduction to common dairy animals and techniques of dairy management - Types, loose housing system and conventional barn system; advantages and limitations of dairy farming - Establishment of dairy farm and choosing suitable dairy animals-cattle - Cattlefeeds, milk and milk products - Cattle diseases Poultry: - Types of breeds and their rearing methods - Feed formulations for chicks - Nutritive value of egg and meat - Disease of poultry and control measures 4. Aquaculture: - Aquaculture in India: An overview and present status and scope of aquaculture. - Types of aquacultures: Pond culture: Construction, maintenance and management; carp culture, shrimp culture, shellfish culture, composite fish culture and pearl culture		14	
Unit III	5. Fish culture: Common fishes used for culture.		14	

	• Fishing crafts and gears. • Ornamental fish culture: Fresh water ornamental fishes- biology, breeding techniques • Construction and maintenance of aquarium: Construction of home aquarium, materials used, setting up of freshwater aquaria, aquarium plants, ornamental objects, cleaning the aquarium, maintenance of water quality, control of snail and algal growth. • Modern techniques of fish seed production 6. Prawn culture: • Culture of fresh and marine water prawns. • Preparation of farm. • Preservation and processing of prawn, export of prawn. 7. Vermiculture: • Scope of vermiculture. • Types of earthworms. • Habit categories- epigeic, endogeic and anecic; indigenous and exotic species. • Methodology of vermicomposting: containers for culturing, raw materials required, preparation of bed, environmental pre-requisites, feeding, harvesting and storage of vermicompost. • Advantage of vermicomposting. • Diseases and pests of earthworms. 8. Lac Culture: • History of lac and its organization, lac production in India. • Lifecycle, host plants and strains of lac insect. • Lac cultivation: Local practice, improved practice, propagation of lac insect, inoculation period, harvesting of lac. Lac composition, processing, products, uses

Semester-II

Year	I	Course Code: 21BSC2C2ZOO2L	Credits	04
Sem.	2	Course Title: Biochemistry and Physiology	Hours	56
Unit No.	Course Content			Hours
Unit I	Structure and Function of Biomolecules: ☐ Structure and Biological importance of carbohydrates (Monosaccharides, Disaccharides, Polysaccharides and Glycoconjugates). ☐ Lipids (saturated and unsaturated Fatty acids, Triacylglycerols, Phospho lipids, Glycolipids and Steroids) Structure, Classification and General Properties of α-amino acids; Essential and non-essential amino acids, Levels of organization in proteins; Simple and conjugated proteins. Enzyme Action and Regulation • Nomenclature and classification of enzymes; Cofactors; Specificity of enzyme action. • Isoenzymes; Mechanism of enzyme action • Enzyme kinetics; Factors affecting rate of enzyme-catalyzed reactions; Equation of Michaelis - Menten, Concept of K_m and V_{max}, Enzyme inhibition ☐ Allosteric enzymes and their kinetics; Regulation of enzyme action.			14
Unit II	Metabolism of Carbohydrates and Lipids ☐ Metabolism of Carbohydrates: glycolysis, citric acid cycle, gluconeogenesis, ☐ Phosphate pentose pathway Glycogenolysis and Glycogenesis Lipids-Biosynthesis of palmitic acid; Ketogenesis, ☐ β-oxidation and omega-oxidation of saturated fatty acids. Metabolism of Proteins and Nucleotides ☐ Catabolism of amino acids: Transamination, Deamination, Urea cycle, Nucleotides and vitamins, Peptide linkages			14

Unit III	Digestion and Respiration in humans • Structural organization and functions of gastrointestinal tract and associated glands. • Mechanical and chemical digestion of food; Absorptions of carbohydrates, lipids, proteins, water, minerals and vitamins.. Mechanism of respiration, Physiology of trachea and Lung Pulmonary ventilation; Respiratory volumes and capacities; Transport of oxygen and carbon dioxide in blood, Respiratory pigments, Dissociation curves and the factors influencing it; Circulation and Excretion in humans • Components of blood and their functions;hemopoiesis • Blood clotting: Blood clotting system, Blood groups:Rh-factor,ABO and MN • Structure of mammalian heart • Cardiac cycle; Cardiac out put and its regulation, Electrocardiogram, Blood pressure and its regulation. Structure of kidney and its functional unit; Mechanism of urine formation	14
UnitIV	Nervous System and Endocrinology in humans • Structure of neuron, resting membrane potential(RMP) • Origin of action potential and its propagation across the myelinated and non myelinated nerve fibers. Types of synapse. • Endocrine glands- pineal, pituitary, thyroid, parathyroid, pancreas and adrenal Muscular System in humans • Histology of different types of muscle; Ultra structure of skeletal muscle; Molecular and chemical basis of muscle contraction; Characteristics of muscle twitch; Motor unit, summation and tetanus.	14

2. Zubayetal: Principles of Biochemistry:WCB (1995)
3. Voet &Voet: Biochemistry Vols 1 & 2: Wiley(2004)
4. Murrayetal: Harper's Illustrated Biochemistry : McGrawHill (2003) Elliott and Elliott : Biochemistry and Molecular Biology: Oxford University Press
5. Guyton, A.C. & Hall, J.E. Textbook of Medical Physiology, XL Edition, Harcourt Asia PTE Ltd. W.B. Saunders Company. (2006).
6. Tortora, G.J. & Grabowski, S. Principles of Anatomy & Physiology. XI Edition JohnWiley & sons (2006).
7. Christopher D. Mayes, Patricia M. Schulte. Principles of Animal Physiology. 3rdEdition, Pearson Education (2016).
8. Hill, Richard W., et al. Animal physiology. Vol. 2. Sunderland, MA: Sinauer Associates, (2004).
9. Chatterjee CC Human Physiology Volume 1 & 2, 11th edition, CBS Publishers (2016).

Semester-II: Zoology Course Lab Content

Course Title/Code: Biochemistry and Physiology	Course Credits: 2
Course Code: 21BSC2C2ZOO2P	L-T-P per week: 0-0-4
Total Contact Hours: 56	Duration of ESA: 4 Hours
Formative Assessment Marks : 25	Summative Assessment Marks: 25

Course Outcomes (COs):

- At the end of the course the student should be able to understand: Basic structure of biomolecules through model making.
- Develop the skills to identify different types of blood cells.
- Enhance basic laboratory skill like keen observation, analysis and discussion. Learn the functional attributes of biomolecules in animal body.
- Know uniqueness of enzymes in animal body and their importance through enzyme kinetics.

Course Articulation Matrix: Mapping of Course Outcomes (COs) with Program Outcomes (POs)

Course Outcomes(COs)/Program	CC P1	CC P2	CC	CC	CC	CC	CC	CC	CC	CC	CC
I Corecompetency		X									
II Critical thinking		X									
III Analytical reasoning		X									
IV Research skills		X									
V Team work		X									

Note: Course Articulation Matrix relates course outcomes of course with the corresponding program outcomes whose attainments attempted in this course. Mark 'X' in the intersection cell if a course outcome addresses a particular program outcome.

Course Content

List of labs to be conducted	Hours
1. Preparation of models of amino acids and dipeptides. 2. Preparation of models of DNA and RNA. 3. Qualitative analysis of Carbohydrates, Proteins and Lipids. 4. Qualitative analysis of Nitrogenous wastes—Ammonia, Urea and Uric acid. 5. Separation of amino acids or proteins by paper chromatography.	20
6. Determination of the activity of enzyme (Urease)-Effect of [S] and determination of-K _m and V _{max} . 7. Determination of the activity of enzyme (Urease)- Effect of temperature and time.	15
8. Estimation of Hemoglobin in human blood using Sahli's haemoglobinometer. 9. Counting of RBC in blood using Hemocytometer. 10. Counting of WBC in blood using Hemocytometer. 11. Differential staining of human blood corpuscles using Leishman stain. 12. Recording of blood glucose level by using glucometer.	15

Pedagogy: Lectures, Presentations, videos, Virtual Labs, Assignments, Tests, Individual or group Field oriented Project Report on or visit to a research institute.

TOPICS RECOMMENDED FOR SEMINAR/ PROJECT REPORT

1. Biochemical pathways, their evolutionary background and regulation.
2. Blood groups and their importance.
3. Vital enzymes for human body.
4. Essential and non essential amino acids.
5. Important body lipids.
6. Significance of animal proteins.
7. Role of carbohydrates in animal body.
8. Nature of proteins and nurture of animal body.
9. Role of lipids in structural and functional organization of body.

OPEN- ELECTIVE SYLLABUS:

Year	I	Course Code: 21BSC2O2ZOO2	Credits	03
Sem	II	Course Title: Parasitology	Hours	42
Unit No.	Course Content			Hours
Unit I	1. General Concepts • Introduction, Parasites, parasitoids, host, zoonosis • Origin and evolution of parasites • Basic concept of Parasitism, symbiosis, phoresis, commensalism and mutualism • Host-parasite interactions and adaptations • Life cycle of human parasites • Occurrence, mode of infection and prophylaxis 2. Parasitic Platyhelminthes Study of morphology, lifecycle, pathogenicity, prophylaxis and control measures of • <i>Fasciolopsis buski</i> • <i>Schistosoma haematobium</i> • <i>Taenia solium</i> 3. Parasitic Protists Study of morphology, lifecycle, pathogenicity, prophylaxis and control measures of • <i>Entamoeba histolytica</i> • <i>Giardia intestinalis</i> • <i>Plasmodium vivax</i>			14
Unit II	4. Parasitic Nematodes Study of morphology, lifecycle, pathogenicity, prophylaxis and control measures of • <i>Ascaris lumbricoides</i> • <i>Ancylostoma duodenale</i> • <i>Wuchereria bancrofti</i> • Nematode plant interaction; Gall formation 5. Parasitic Arthropods Biology, importance and control of • Ticks(Soft tick <i>Ornithodoros</i>, Hard tick <i>Ixodes</i>) • Mites(<i>Sarcoptes</i>) • Lice(<i>Pediculus</i>) • Flea(<i>Xenopsylla</i>) • Parasitoid(Beetles) 6. Parasitic Vertebrates • Cookicutter Shark • Hood Mocking bird and			14

	Vampire bat and their parasitic behavior and effect on host	
Unit III	7.Molecular diagnosis & clinical parasitology • General concept of molecular diagnosis for parasitic infection • Advantages and disadvantages of molecular diagnosis • Fundamental techniques used in molecular diagnosis of endoparasites • Immunoassay or serological techniques for laboratory diagnosis of endoparasite on the basis of marker molecules like G.intestinalis, B.coli, E.histolytica, L.donovani, malarial parasite using ELISA, RIA • Counter Current Immuno electrophoresis (CCI) Complement Fixation Test (CFT) PCR, DNA, RNA probe.	14

III Semester BSc Zoology Core Course Content

Course Title/Code: Molecular Biology, Bioinstrumentation & Techniques in Biology	Course Credits: 4
Course Code: DSCC5ZOOT3	L-T-P per week: 4-0-0
Total Contact Hours: 56	Duration of ESA: 2Hours
Formative Assessment Marks: 40	Summative Assessment Marks: 60

Course Outcomes (COs):

At the end of the course the student should be able to understand:
1. After successful accomplishment of the course, the learners will be able to acquire better understanding and comprehensive knowledge regarding most of the essential aspects of Molecular Biology subject which in turn will provide a fantastic opportunity to develop professional skill related to the field of molecular biology.
2. The course will mainly focus on the study of principal molecular events of cell incorporating DNA Replication, Transcription and Translation in prokaryotic as well as eukaryotic organisms.
3. Acquiring knowledge on instrumentation and techniques in biology.

Semester III-Zoology Core Course III Content:

Content	Hours
Unit I	14
Chapter1: Process of Transcription - Fine structure of gene (Cistron, Recon, Muton) - RNA polymerases-types and functions - Transcription in prokaryotes and eukaryotes	8
Chapter2: Process of Translation - Genetic code and its salient features - Translation in prokaryotes and eukaryotes	6
Unit II	14
Chapter3: Regulation of gene expression-I - Regulation of gene expression in prokaryotes- lac operon (inducible) and trp operon (repressible) in <i>E.coli</i> - Regulation of gene expression in eukaryotes-Role of chromatin (euchromatin and heterochromatin) in gene expression - Post-transcriptional modification: capping, splicing, polyadenylation - Concept of RNA editing (mRNA), gene silencing, and RNAi.	9
Chapter4: Regulation of gene expression-II - Post-translational modifications: purpose, advantages, and significance; glycosylation, methylation, phosphorylation, and acetylation. - Intracellular protein degradation (lysosomal autophagy and ubiquitin proteasome Pathway).	5
Unit III	14

Chapter5: Microscopy Principles and applications of Light microscopy, Dark field microscopy, Phase contrast microscopy, Fluorescence microscopy, confocal microscopy and Electron microscopy (SEM and TEM).	9
Chapter6: Centrifugation and Chromatography - Centrifugation: Principles, types, and applications (High speed and Ultracentrifugation) - Chromatography: Principle and applications of: TLC, HPLC and GC	5
Unit IV	14
Chapter 7: Biochemical Instrumentation - Colorimetry and Spectrophotometry: Beer-Lambert's law, Absorption spectrum, UV-VL Spectrophotometer. - pH meter, measurement of pH - Principle, applications and safety measure of Radio-tracer techniques- Autoradiography.	6
Chapter 8: Molecular Techniques - Principle and applications of Agarose gel-electrophoresis, SDS-PAGE, DNA Sequencing (Sanger's Dideoxymethod) , PCR, DNA Fingerprinting, ELISA, Southern Blotting and Western Blotting.	8

Semester III (Practical III)**Core Course Lab Content**

Course Title: Molecular Biology, Bioinstrumentation and Techniques in Biology	Course Credits:2
Course Code:DSCC5ZOOP3	L-T-P per week: 0-0-4
Total Contact Hours: 56	Duration of ESA: 4Hours
Formative Assessment Marks: 25	Summative Assessment Marks: 25

Course Outcomes (COs):

At the end of the course the student should be able to:

1. At the end of the course, students will be able to understand the applications of biophysics and principle involved in bio-instruments.
2. Understand the methodology involved in biotechniques.
3. Students can demonstrate knowledge and practical skills of using instruments in biology and medical field.
4. They can perform techniques involved in molecular biology and diagnosis of diseases.

Lab Course Content

List of experiments	14 units(1unit-4hrs)
1.To study the principle and applications of simple,compound and binocular microscopes.	1
2.To study the principle and applications of various lab equipments-pH meter, Electronic balance, Vortex mixer, use of glass and micropipettes, Laminar airflow, Incubator, shaker, Waterbath and centrifuge.	2
3.To prepare Buffer solutions (Phosphate, Citrate, Tris-HCl buffer)	1
4. To estimate amount of RNA by Orcinol method.	2
5.Demonstration of differential centrifugation to fractionate components in a Given mixture.	1
6. To estimate amount of protein by Lowry's method.	2
7.To identify different unknown amino acids using ascending paper Chromatography.	1
8. Extraction of DNA from the given animal tissue sample.	2
9. To estimate amount of DNA by di-phenyl amine (DPA) method.	2

Suggested Readings:

1. Bruce Alberts, Alexander Johnson, Julian Lewis, Martin Raff, Keith Roberts, and Peter Walter. Molecular Biology of the Cell, 4th edition. New York: Garland Science (2002).
2. Daniel L. Hartl and Maryellen Ruvolo. Genetics: Analysis of Genes and Genomes, 8th Edition. Burlington, Mass.: Jones & Bartlett Learning (2012).
3. Gerald Karp. Cell and Molecular Biology: Concepts and Experiments, 5th Edition. Wiley Publication (2008).
4. Harvey Lodish, Arnold Berk, Paul Matsudaira, Chris A. Kaiser, Monty Krieger, Freeman. Molecular Cell Biology, 5th edition. W.H. & Company (2003).
5. James D. Watson, Tania A. Baker, Stephen P. Bell, Alexander Gann, Michael Levine, Richard Losick. Molecular Biology of the Gene, 5th edition. Cold Spring Harbor Laboratory Press (2003).
6. Stryer, Lubert. Biochemistry, 2nd Edition. W.H. Freeman and Company, New York (1981).

Open Elective Course Content

Course Title: ENDOCRINOLOGY Course Code: OEC5ZOOT3	Course Credits: 3
Total Contact Hours: 42	Duration of ESA: 3Hours
Formative Assessment Marks: 40	Summative Assessment Marks: 60
Model Syllabus Authors:	

Course Outcomes (Cos):

At the end of the course the student should be able to:

Differentiate among endocrine, paracrine and autocrine systems.

1. Describe the different classes and chemical structures of hormones.
2. Identify the glands, organs, tissues and cells that synthesize and secrete hormones, hormone precursors and associated compounds.
3. Identify and discuss the integration of the endocrine system in general with focus on specific interactions.
4. Explain the consequences of under-and overproduction of hormones.

Course Content

Content	Hrs.
Unit I	14
Chapter 1. About Endocrine glands • Endocrine glands and classifications of hormones. • Characteristics and Transport of Hormones.	
Chapter 2. Hypothalamus-Hypophysis • Hypothalamus as a neuroendocrine organ • Pituitary– Structure and functions • Chemical nature, mode of action, and functions. • Pituitary disorders	
Chapter 3. Pineal gland • Structure and functions of Pineal gland. • Hypo-and hyperactive states of the gland.	
Unit II	14
Chapter 4. Thyroid and parathyroid • Histological structure of the glands. • Chemical nature, mode of action, and functions of the hormones. • Hypo- and hyperactive states of the glands. Chapter 5.: Adrenal cortex and medulla– • Histological structure of the gland. Chemical nature, and functions • Hypo-and hyperactive states of the gland. Chapter 6. Prostaglandins	
Unit– III	14

Chapter7:Pancreas: • Pancreatic islets-histological structure. Chemical nature and function. Hormonal control of blood sugar. • Hyperinsulinism and diabetes mellitus. Chapter8:Gastro-intestinal hormones– • Functions and regulation of secretion of the hormones. Chapter9:Differents types of Rhythms– • Ultradian, circadian, infradian. Different zeitgebers and their relation with circadian clock • Neural basis of biological clock and role of suprachiasmatic nuclei. Sleep-wakefulness cycle. Time keeping genes. Jet-lag and shift work.	
--	--

Text Books & Suggested Readings:

1. William's TextBook of Endocrinology Larsen et al.: An Imprint of Elsevier.
2. Endocrinology, Mac E.Hadley, Pearson Education.
3. The Kidney-An outline of Normal and Abnormal Functions, by H.E.Dewardener, ELBS.
4. Vander's Human Physiology, E.P.Widmaier et al., McGraw- Hill, Higher Education.
5. Concise Medical Physiology by S.K.Chaudhuri, New Central Book Agency.
6. Endocrinology.Vols.I, II and III by L.O.DeGroot. W.B.Saunders Co.
7. The Physiology of Reproduction, Vols.I&II, by E.Knobil and J.D.Neil. Raven Press.
8. Guyton and Hall. Textbook of Medical Physiology. 13th Edition.
9. Histology: A Text and Atlas. Sixth Edition. Ross & Pawlina. Lippincott Williams & Wilkins.
10. Vertebrate Endocrinology by David O.Norris.

IV Semester, B.Sc, (Hons) Zoology

Course Title: Gene Technology Immunology and Computational Biology	Course Code: DSCC5ZOOT4
Course Type: Discipline Core Theory, L-T-P: 4-0-0	Course Credits: 4
Total Contact Hours: 56	Duration of ESA: 2Hrs.
Formative Assessment Marks: 40	Summative Assessment Marks: 60

At the end of the course the student should be able to:

1. Acquaint knowledge on versatile tools and techniques employed in genetic engineering and recombinant DNA technology.
2. An understanding on application of genetic engineering techniques in basic and applied experimental biology.
3. To acquire a fundamental working knowledge of the basic principles of immunology.
4. To understand how these principles, apply to the process of immune function.
5. Use, and interpret results of, the principal methods of statistical inference and design; helps to communicate the results of statistical analyses accurately and effectively; helps in usage of appropriate tool of statistical software.

Course Content	Hrs.
Unit I	14
Chapter 1: Principles of Gene Manipulation ● Recombinant DNA Technology: Introduction, steps involved. ● Restriction Enzymes and Ligases and Nucleic acid modifying enzyme. ● Gene cloning Vector: Concept of plasmids-pBR322, Lamdaphage vectors, cosmids ● Gene transfer techniques (Direct and indirect). ● Screening and selection of recombinant colonies	07
Chapter 2: Applications of Genetic Engineering ● Transgenic animals (Transgenic cow, Transgenic Fish); Transgenic plants (cryprotein); Gene silencing (Knockout and Knock in mouse). ● Production of Human Recombinant insulin and ● Hybridoma technology: Synthesis and applications of Monoclonal antibodies ● Gene Therapy (SCID) ● Biosensors and its applications	07
Unit II	14

Chapter3:IntroductiontotheImmuneSystem • Defense against diseases: Introduction, First and second line of defense, Innate and acquired immunity; Antigen presenting cells (APC's), Role of Band T-lymphocytes (humoral immunity and cell mediated immunity), primary and secondary immune response. • Types of immunity • Functional aspects of organs of the Immune system-Thymus and bone Marrow, spleen, Lymph Node, Small intestine and Liver (Peyer's patches and Von Kupffer cells).	07
Chapter 4: Antigens and Antibodies • Antigens and haptens: Properties (foreignness, molecular size, heterogeneity). • Band T cellepitopes. • Structure of Ig Gandfunctions of different classes of immune globulins. • Major histo compatibility complex –Structure of MHCI&II.	07
Unit III	14
Chapter5: Clinical Immunology • Immunity against diseases of viral, bacterial and protozoan infections. • Vaccines: Types and Uses-Immunization schedule for children. • Transplantation immunology: Transplantation of organ- Types, graft rejection and Immuno-suppressors.	07
Chapter6:Bioinformatics • Databases:Sequence and structural • Sequence analysis (homology):Pair wise and Multiple Sequence alignment-BLAST, CLUSTALW, Sequence alignment-FASTA. • Scope and applications of Bioinformatics.	07
Unit-IV	14
Chapter7:BiostatisticsI • Measures of central tendency: Mean, Median, Mode. • Data summarizing: Frequency distribution, Graphical presentation - bar diagram, pie diagram, histogram. • Elementary idea of probability and its applications.	07
Chapter8:BiostatisticsII • Measures of dispersion: Range, Standard Deviation, Variance. • Correlation and Regression. • Tests of significance-test,ANOVA,t-test and Chisquare test.	07

Topics Suggested for Assignment/Formative Assessment:

1. Q/A, Short Question, Quiz, MCQ, Assignment etc.

Recommended Books:

Course Lab Content

Course Title: Gene Technology, Immunology and Computational Biology	CourseCredits: 02
Course Type: Minor Discipline Core Practical, L-T-P:0-0-4	CorseCode:DSCC5ZOOP4
Total Contact Hours: 56	DurationofESA: 4Hours
Formative Assessment Marks: 25	Summative Assessment Marks: 25

Course Outcomes (COs):

At the end of the course the student should be able to:

1. Accurately, safely and appropriately use all the equipment regularly used in Molecular Biology (DNA manipulation, including balances, pipettes, electrophoresis and centrifuges).
2. Prepare chemical solution and reagents to the precision appropriate to the task.
3. Demonstrate knowledge of the biochemical basis underpinning the molecular biology techniques.

Lab IV Course Content

List of labs to be conducted	Hours 56
1. Calculate the mean, median, mode and standard deviation (Measurement of pre and post clitellar lengths (with suitable examples).	2 2
2. Measure the height and weight of all students in the class and apply statistical measures.	1
3. Determination of ABO Blood group and Rh factor.	1
4. To study Restriction enzyme digestion using teaching kits (Demonstration only).	2
5. To detect genetic mutations by Polymerase Chain Reaction (PCR) using teaching kits (Demonstration only).	2
6. Demonstration of agarose gel electrophoresis for detection of DNA.	
7. Demonstration of Polyacrylamide Gel Electrophoresis (PAGE) for detection of proteins.	1
8. To calculate molecular weight of unknown DNA and protein fragments from gel pictures.(https://youtube/mCiCiO0cfbg)	1
9. To learn nucleotide sequence database.	1
10. To learn sequence alignment: Pairwise alignment (Protein/DNA).	1

Open Elective Course Content

Semester: IV Zoology

Course Title: Animal Behaviour Course Code: OEC5ZOOT4	Course Credits: 3
Total Contact Hours: 42	Duration of ESA: 2 Hours
Formative Assessment Marks: 40	Summative Assessment Marks: 60
Model Syllabus Authors:	

Course Outcomes (COs):

At the end of the course the students will be able to:

1. Examine and critically to evaluate the emergence of ideas that have shaped how we observe and collect data on animal behavior.
2. Understand the main historical ideas that underpin animal behaviour theory
3. Critically review hypotheses to explain animal behavior
4. Understand different methods for collecting data on animal behaviour
5. Have advanced their written and oral presentation skills.

Course Content

Content	42Hrs
Unit– 1	
Chapter 1.: Introduction to Animal Behaviour • Brief contributions of Karl Von Frish, Ivan Pavlov, Konrad Lorenz, Niko Tinbergen. • Proximate and ultimate causes of behaviour. Chapter 2. Patterns of Behaviour • Stereotyped Behaviors- Orientation and Reflex. • Individual Behavioural patterns: Instinct and Learned Behaviour • Associative learning, classical and operant conditioning, Habituation, Imprinting.	14
Unit–2	14
Chapter 3. Social Behaviour: • Social organization in termites and honeybees. • Social behaviour: Altruism. • Conflict behaviour. Chapter 4. Sexual Behaviour • Sexual dimorphism, Mate choice in peacock. • Intra-sexual selection (male rivalry in red deer). • Kinship theory: Relatedness & inclusive fitness. • Parental care in fishes (Nest Building & cost benefit)	
Unit– 3	14

Chapter5.Chronobiology	
-------------------------------	--

- | | |
|--|--|
| <ul style="list-style-type: none">• Brief historical developments in chronobiology.• Adaptive significance of biological clocks.• Biological Rhythms | |
|--|--|

Chapter6:Communicationsinanimals	
---	--

- | | |
|--|--|
| <ul style="list-style-type: none">• Bioluminescence in deep sea fishes and insects• Territoriality in Monkeys and Dogs• Role of pheromones in animal communication- Insects and Vertebrates,• Communication in Honeybees (Waggle Dance) | |
|--|--|
