Accredited with CGPA of 2.99 at 'B++' Grade in 4<sup>th</sup> Cycle by NAAC  
(Affiliated to Rani Channamma University, Belagavi)

**Department of English (UG)**  
**Remedial Class 2023-2024**

**Syllabus**

**CONTENT:**

**UNIT I**

2Hrs

Phonetics  
Speech Mechanism  
Organs of speech sound

**UNIT II**

2Hrs

Syntax  
Types of Sentence

**UNIT- III**

2Hrs

History of Indian English Literature.  
Post Independence  
Pre Independence

**OUTCOMES:**

1. Acquire the knowledge of Phonetics and its concepts.
2. Gain an understanding of syntax and its typers
3. Trace and understand the development of Indian English Literature.

Examination on Remedial Class

Semester: II

Date: 28/11/2023

Time: 1:10 to 2:00

Marks: 30

Q.NO: I Answer any five the following question below.

2X5=10

1. What is phonetic?
2. What is Syntax?
3. Mention any two type's syntax.
4. Which is first novel in Indian English Literature?
5. Who is the author of "Casuarina Tree".
6. Mention any two works Sarojini Naidu

Q.NO: II Write a short note any two of the following.

5X2=10

1. Speech Mechanism
2. Raj Mohan Wife
3. R.K. Narayan

Q.NO: III Write an essay on any one of the following.

10X1=10

1. Organs of Speech Sounds.
2. Ravindranath Tagore

Q. I.

- 1] Phonetics is a branch of linguistics that studies the sounds of human speech. It focuses on how speech sounds are produced, transmitted and perceived.
- 2] Syntax is a branch of linguistics that studies the rules and principles that govern the structure of sentences in a language.
- 3] Rajmohan's Wife by Bankim Chandra Chattopadhyay.
- 4] Toru Dutt was the author of Casuarina Tree.
- 5] • The Golden Threshold  
• The Bird of Time

II.

### 1] Speech Mechanism

The speech Mechanism is a complex process that involves the brain, lungs, larynx and other organs to produce sound and shape it into words.

- Brain :- The brain plays a key role in speech production. Broca's area in the frontal lobe controls speech production.
- Lungs :- Air is drawn into the lungs by lowering the diaphragm and expanding the chest cavity.

Air is expelled by contracting the rib cage and increasing lung pressure.

- Larynx :- The larynx, also known as the voice box, contains the vocal cords, which are two lip-like membranes that vibrate to create sound.
- Articulators :- The tongue, lips, jaw and teeth shape the sound into words. These organs are called articulators, and there are both active and passive types.
- Nasal Cavity :- The nasal cavity is used to produce nasal sounds. When the velum is lowered, the nasal cavity is acoustically combined with the vocal tract.

### 3] R.K. Narayan

R.K. Narayan (1906-2001) is one of the most celebrated figures in Indian English literature. Known for his simple yet profound storytelling, Narayan captured the essence of Indian life through his works, often set in the fictional South Indian town of Malgudi. His writing style is marked by humor, irony and a deep understanding of human nature, making his stories relatable and timeless.

#### Works :-

- Swami and Friends (1935) :- His debut novel, introducing Malgudi and its charming characters.
- The Bachelor of Arts (1937) :- A semi-autobiographical account of a young man's journey through college life.
- The English Teacher (1945) :- A poignant exploration of love and loss.

• The Guide (1958) : His most famous work, which won the Sahitya Akademi Award and was later adapted into a film.

• Malgudi Days (1943) : A collection of short stories showcasing the everyday lives of Malgudi's residents.

✓ R.K. Narayan's works reflect India's social and cultural fabric, making him a pioneer in bringing Indian experiences to a global audience.

No. III

### 1) Organs of Speech Sounds

We need an air mechanism to produce the speech sound. The most sounds are produced with a pulmonic egressive air-stream mechanism. The air that we breathe out comes out of the lungs. Before it gets out of the outer lungs atmosphere, various organs of our body convert it into speech sound. These organs are called speech organs.

Organs of speech are described under three systems.

#### 1. Respiratory System

• Lungs • The Muscles of the Chest • Wind pipe

• Lungs : Perform the action of breathing or respiration (Exhalation - Inhalation). The lungs provide the source of energy for our vocal activity by this airstream.

• The Muscles of the Chest :- The lungs perform respiration under the function of the muscles of the chest.

• The Windpipe (Trachea) :- The air passes through the windpipe.

## II. The Phonatory System

- The Larynx :- It is a bony box-like structure in the front part of the throat and the upper part of trachea. It's known as 'Adam's Apple' too.
- Vocal Cords :- Vocal cords are a pair of lip-like structure inside the larynx. These cords are placed horizontally from front to the back, joined at the front and separated at the back.

## III. Articulatory System

After Larynx, the airstream passes through other 9 organs of speech that are laying above the Larynx.

- Lips :- The upper and lower lips have important role in producing certain speech sounds.
- Teeth :- Certain consonants are produced with the help of teeth.
- Alveolar Ridge :- It's located just behind the upper front teeth and consonantal sounds.
- Hard Palate :- The hard bony surface of the roof of the mouth immediately after alveolar ridge.
- Soft Palate :- The soft or moveable part of the roof of the mouth, immediately after the hard palate.
- The Uvula :- It's a small fleshy pendent structure at the very end of the soft palate. The back of the tongue articulates with Uvula and produce /g/ sound.
- Tongue :- Most important single organ of speech. It's flexible and can make a large number of gestures to produce speech sounds.
- Pharynx :- It's like a tube just above the larynx and before Uvula.
- Glottis :- It is the space between the vocal cords.
