## Introduction:

Education all over the world is expected to produce effective honest and disciplined citizens. However, discipline which is the hall mark of our educational system

What is dress code ? Dress code is an accepted way of dressing for particular occasion or in a particular situation or it is a set of rules about clothing and appearance in a school or place of work.

Dress Code does not necessarily mean college uniorm. A decent, smart and formal dress what is expected in a formal place like college. It is place were students from different backgrounds and Cultures to learn. Hence homogeneity is imperative. A dress code brings about unity and eliminates discrimination.

Nothing should be implemented for anyone without any strong reason college students are quite mature to understand the gravity of the issue so it was very Imp to find out their perception regarding the dress code so as to understand its significance from student's perspective.

This study would focus on the preception of students regarding the uniform dress code and find out the benefits to students and institution from having a uniform dress polices.

### Methodology :

For our study primary data was collected from the S B Arts and K C P Science Degree college, vijayapura. 100 students randomly selected from all the classes including male and female students. Suitable questionarie was framed to study opinion about the dress code for college students. Descriptive statistics was used for the analysis of the data.

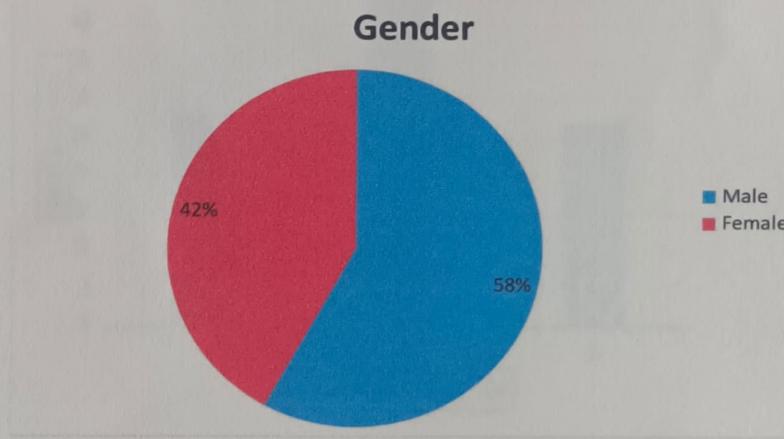

Objectives :

- 1) To study the perception about the dress code for the college students
- 2) To study the benefits of the students by imposing the dress code for the college students

**Limitations of study:**

1. Students surveyed were management students since most have a dress code.
2. Due to lack of time and resources, samples were taken randomly from the college.

**Conclusion:**

The review of literature shows that institutions were facing serious dilemma of whether to impose dress code on students. Students wear jackets or some other clothing to signify their affiliations to particular social groups. Hand -bands and particular colored handkerchief are used to signify some objectionable messages. To overcome these problems, educational institutions are implementing dress code policies to maintain a safe and healthy learning environment. Some of the research findings also show that having a uniform dress code doesn't have any bearing on the academic performance of students. It may also restrict students right of expression and the ability to experiment on oneself to develop their own identities and creativity.

According to our study students have a positive attitude towards uniform. Dress code plays an important role in maintaining safe and healthy learning environment in the college. It brings a sense of belongingness in the students. It adds to reputation of the institution. Having uniform dress code creates a social uniformity among students which helps in act more responsible. Therefore, this study recommends the introduction of uniform dress code for college students.
